Career Objective

Passionate Frontend Developer dedicated to building interactive and user-friendly interfaces, with a solid foundation in programming fundamentals, including data structures and algorithms. Skilled in developing modern web applications using React.js and Next.js, with a continuous drive to enhance my skills and stay updated with the latest technologies.

I believe coding is more than just writing lines of code—it's about transforming ideas into impactful digital experiences. I aim to contribute to creative environments where I can apply my skills to develop efficient solutions that meet user needs.

Education

2021 – 2025	**B.Sc. in Computer and Artificial Intelligence – Information Systems Department**
benha, Egypt	**Benha University** ⧉

Projects

Graduation Project: JeeLMS (Smart Learning Management System (LMS)) ⧉
- 💡 *This project was built around a powerful and flexible Spaces-based structure, where each course (Space) is an independent environment for managing sessions, materials, and communication.   - with features including attendance, chat, assignments, quizzes, and role-based access (Admin, Instructor, Student). - Technologies: React, Node.js, Flutter. - Supported generating reports for attendance and grades.*

My-3d-Portfolio ⧉
A modern and interactive personal portfolio website that showcases my skills, projects, and contact information. Built with React and styled using Tailwind CSS, it features smooth animations, a dark theme, and responsive design to ensure optimal user experience across all devices.

Fresh Cart ⧉
A Fresh Cart App is an e-commerce website that has a lot of features, such as authentication: Fully validated forms for register, login, forget password and reset password, handling shopping, cart, Wishlist, checkout Process and payments.

Google Gemini Chatbot ⧉
This innovative web application leverages the cutting-edge capabilities of Google's Gemini AI to provide an interactive and intelligent chatbot experience.

Start-Framework-React ⧉
Diving into modern JavaScript frameworks has been a fantastic journey, and starting with React has opened up a world of possibilities for building dynamic and efficient web applications.

Customer-Transactions ⧉
This application retrieves customer and transaction data from a provided API endpoint and displays it in a user-friendly format. • contain a graph that displays the total transaction amount per day for the selected customer.

Yummy ⧉
Yummy is a dynamic food website where you can explore random meals, search for your favorite dishes, and learn more about meals by categories, areas, and ingredients. The website also includes a contact form with full validation.

RouteJobFair ⧉

It show details about the event participants and time till event starts.

Weather-App ⧉

This app is designed to provide real-time weather updates and forecasts with some exciting features: 📍 *Current Location Weather: Automatically fetches and displays the weather based on your current location.* 🔍 *Search Functionality: Allows you to search for and view the weather in any location worldwide.* 🔗 *API Integration: Utilizes a weather API to fetch accurate and up-to-date weather information.*

TO-DO-LIST ⧉

This simple and elegant application allows users to create and organize their daily tasks with ease, now with a new filtering feature that lets you display only completed or incomplete tasks.

CRUDS ⧉

I developed a CRUDS (Create, Read, Update, Delete, Searsh) system that displays products in a smooth and attractive way. This system allows users to view product details, including price, taxes, ads, discounts, and product type.

Devfolio ⧉

💼 *Showcase your work, skills, and projects in style with this free Bootstrap 5 HTML5 template. It's built with HTML, CSS, and Bootstrap, making it easy to customize and use. You'll love its clean and minimal design and one-page layout. Plus, it comes with a super cool animated sticky top navigation bar!* 🚀
